To: bryanboy@gmail.com

Hello.

We had to suspend the account _____ due to high CPU and RAM usage.

Currently the web site is using about 6% of CPU and 22% of RAM.

Our limits are 10% of each resource.

Here is the files that were the cause of overloading issue:

Top Process %CPU 13.7 httpd [esc87.midphase.com] [~/ihate/bryanboy

/advertorials/inside_richie.jpg]

Top Process %CPU 10.9 httpd [esc87.midphase.com] [~/ihate/bryanboy

/images/070506_pretty.jpg]

Top Process %CPU 9.9 httpd [esc87.midphase.com] [~/ihate/bryanboy

/images/090906_HOLAMOTHERFUCKERS.j]

Unfortunately we can't afford to host so large account on a shared server it affects other accounts.

I strongly recommend you to consider upgrade to a dedicated or VPS server or limit your downloads.

More information for a VPS or dedicated servers you can find on the following pages:

http://midphase.com/html_files/hosting_plan_vps.php

http://midphase.com/html_files/hosting_plan_dedicated.php

Thank you.
